### **JBoss Application Server offers Distributed Caching Mechanism with its Integration of FrontierSuite from ObjectFrontier Inc.**

Atlanta, GA – February 19, 2002 – JBoss Group LLC, the leading OpenSource J2EE-based application server, today announced an alliance with ObjectFrontier Inc, a leading provider of component-based software, development tools and IT consulting services, to extend the development and runtime capabilities of JBoss Application Server.

JBoss has partnered with ObjectFrontier to provide powerful and scalable solutions on JBoss Application Server. JBoss customers can use FrontierSuite, ObjectFrontier's flagship product, to reduce their development effort and cost by 70% while also increasing their applications' performance through the use of distributed caching capabilities with synchronization. ObjectFrontier's products are designed to plug and play with other products. ObjectFrontier's value proposition is based on customers getting value from the use of the products that are based on open standards.

Some of the benefits of using ObjectFrontier's FrontierSuite include:

The capability of persisting in disparate EISs like Relational Database, ERP and CRM systems, using JCA architecture.

Complete support for Java Transaction API (JTA)

Enterprise Java Beans Query Language (EJB-QL) for portable selector methods

Container-managed relationships for entity beans with container-managed persistence

Client level and Process level distributed caching for beans along with their relations through Java Message Service (JMS).

OQL based XML extraction

"Our open standards based products are designed to be portable across J2EE application servers and run against JDBC compliant data stores and JCA enabled Enterprise Information Systems (ERP and CRM)," said Shirish Shetty, Director of Business Development for ObjectFrontier. "Our products enhance the capabilities of JBoss Application Server, making it an even more powerful application server for their clients. JBoss is quickly becoming the defacto standard for J2EE development and we think our combined offerings provide an even more compelling solution for customers."

"With 120,000 downloads in January, JBoss dominates the J2EE Enterprise Development sphere. We need to offer a wider range of tools to our extended user base. Distributed caching is one of the most performance-critical points of large deployments. We know a large fraction of our user base will welcome ObjectFrontier's worthy and timely addition to our industry-leading web-app server. Speed up your JBoss installations. Check out ObjectFrontier's Distributed Caching," stated Marc Fleury, Founder of JBoss and President of JBoss Group LLC. ObjectFrontier's FrontierSuite can be ordered by calling 770-777-8180.

#### **About ObjectFrontier**

ObjectFrontier is a provider of component and service oriented enterprise software. ObjectFrontier's robust and scalable products can be used independently or in combination with ObjectFrontier services. ObjectFrontier offerings are based on open standards and can easily be integrated with market leading applications. Global 2000

## **PRESS NOTE**

Companies, System Integrators and Independent Software Vendors are the primary users of ObjectFrontier technology.

### **About JBoss**

JBoss is an Open Source, standards-compliant, J2EE-based application server implemented in 100% Pure Java. The JBoss community of over 1000 developers worldwide is working to deliver the full range of J2EE tools as the premier enterprise Java application server for the Java 2 Enterprise Edition platform. With upwards of 100,000 downloads per month, JBoss is the most downloaded J2EE-based application server in the industry. JBoss can be embedded in commercial products and is being used in production around the world.

JBoss Group LLC is an Atlanta-based professional services company, created by Marc Fleury, founder and lead developer of the JBoss application server. JBoss Group brings together core JBoss developers to provide superior "From the Source" services such as training, support, consulting, and documentation, as well as management of the JBoss software and services affiliate programs. These commercial activities subsidize the development of the free JBoss server. For more information please see: [www.JBoss.org](http://www.JBoss.org).
