ObjectFrontier Software expands its operations unit

Chennai: ObjectFrontier Software (P) Ltd today announced its expansion plans by setting up a primary offshore development center at Ascendas, the International Tech Park (ITP), Chennai. The center with state-of-the-art facilities is the second and most modern in OFS' s portfolio in India. The Centre will be in line with its philosophy of providing cutting edge solutions of international standards.

With a total area of 21,800 square feet, the center is built to house over 200 professionals. It plans to invest 2 million in the center and recruit about 100 people this year. The new world-class facility is expected to accelerate the company's position as the largest IT provider in the region.

James Walter, CEO, OFS says, "Housed in a world-class IT park, the new venture will create an improved working environment and business atmosphere that would enable our employees to continue providing the path breaking services. This new facility will also help us scale up our operations from being a 2 million-turnover company to being a 100 million-turnover company in the next five years. We would be looking at subsequent enhancements to be implemented only at IT parks. "

The decision to expand the existing Chennai operations is part of OFS' strategy to support the targeted business growth. The new facility has been designed for OFS' unique blended delivery models and to accommodate all the necessities of its burgeoning offshore business. OFS has been involved in the development of some very large mission-critical projects globally and Ascendas affords all the latest top-notch facilities that are synergistic to the future development of OFS.

About ObjectFrontier Software (P) Ltd

OFS develops and delivers robust and scalable software products and multi- dimensional IT services. The company's services include Turnkey Projects, Fixed Price Contracts, Men & Material Contracts, and Level-of-Effort Maintenance contracts. ObjectFrontier's core strength rises from its highly successful SunTone certified, O/R mapping product, FrontierSuite for J2EE v 3.1 (CMP/JDO/FCM). With a customer base stretching across 4 continents, ObjectFrontier has due support from the HQ in USA. OFS forges strong partnership with almost all the leading providers of open standards based infrastructure frame works.
