

Extended Engineering Team for Leading Financial Services Firm

The client is a premier marketplace and transaction solutions provider for the real estate, mortgage and consumer debt industries.

OFS started the relationship as one of multiple vendors developing the new UI layer of clients product suite, which delivered a consistent user experience across all products. Within one year, OFS demonstrated our value and became an extended development team contributing to multiple projects. This team handled a wide range of projects including web and mobile apps, plugin components, UI development, UX design, continuous integration and delivery through DevOps, and automated testing and performance monitoring.

Business Benefits:

- Client had access to a flexible resource capacity from OFS that helped meet its changing business needs.
- Quick time-to-market
- Predictable delivery increased customer satisfaction levels.

Key Highlights

Correspondence Management Platform

- OFS developed a comprehensive platform to automate document generation, distribution, archival and retrieval. It is capable of integrating with all commercially available servicing, origination and process management applications. It makes template-driven mortgage communication processes faster and more efficient.

Mortgage Trading Solution

- This is a platform where financial institutions and banks can buy or sell open mortgage loans based on the bidding process.

Mobile App for Field Inspection

- OFS created a mobile app for field inspectors and approvers to receive requests from customers to conduct site inspections and report their findings.

Vendor Oversight Platform

- This platform tracks all vendors in one place and receives timely alerts and insights into vendor conformity. It also provides a bird's-eye view into a vendor's regulatory status, certification, risk level and other variables through a user-friendly dashboard interface.

Loan Origination Platform

- A full suite of services to meet the evolving needs of loan originators and correspondents. It consist of the following core modules:
 - **The Borrower Portal**
 - **The Originator Portal**
 - **The Loan Processing Engine**
 - **eDocument Management**
 - **eSignature Management**
